

# Rutherfordium

Transition Metal

Symbol

**Rf**

Atomic number

**104**

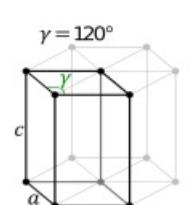

Atomic weight (amu)

**261**

Phase - Solid

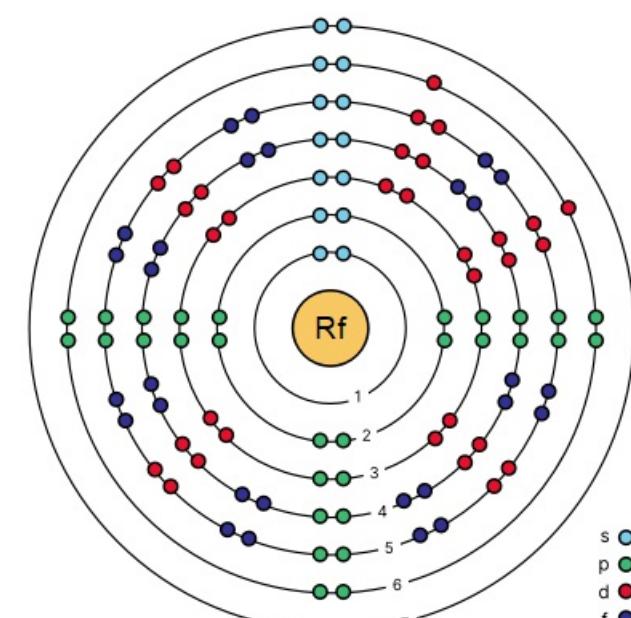

Crystal Structure

Simple Hexagonal

History

The element Rutherfordium was discovered by A. Ghiorso, M. Nurmia, J. Harris, K. Eskola and P. Eskola in year 1969 in Russia and United States. Rutherfordium was first isolated by in . Rutherfordium derived its name from Ernest Rutherford, chemist and physicist.

[Rn] 5f14 6d2 7s2  
[2, 8, 18, 32, 32, 10, 2]
